Raising \$1.75M at \$5M pre-money

Investor Presentation · August 2026 · Confidential · Prepared with AI assistance; all data and financial terms verified by CiteMetrix LLC

It started with a question we could not answer.

The chief executive of a specialty materials manufacturer — a client of four years — wanted to know what AI systems were saying about his company. Whether they recommended it. Whether what they said was true.

No tool could answer him. CiteMetrix was built to answer that question. His company is still monitored today.

The buyer asked first

- The demand came from a chief executive — a four-year client — not from an SEO practitioner.
- It arrived before any product existed to sell him.
- A second signal followed from within our own network: an agency managing director, asking the same question.

Every funded competitor in this category sells to the SEO practitioner.

The person who asked the question sits one floor up, controls a larger budget, and is being asked it by their own board.

WHAT WE MEASURED

A brand is visible once you already know its name — and invisible at the moment someone is choosing.

Notion · 15 monitored queries · 7 AI platforms · July 2026

Strong on the branded query. Absent on the category one.

0.0%

"Top productivity apps for remote teams in 2026"

Asked 30 times. Cited zero times.

The same shape in pharma

A prescription respiratory brand: cited on effectively every branded query, and 0.0% on multiple category questions.

And when AI does speak, it gets things wrong.

2,957

open issues

1,991

critical

636

on the pediatric fact

4

AI platforms in error

AI told patients the drug is approved for children 6 years and older.

The approved indication is 4 years and older. Multiple platforms. Repeatedly. Every instance captured verbatim, against the brand's own verified regulatory facts.

This is not a marketing problem. It is a labelling-accuracy problem, surfacing in the channel patients and prescribers actually use — and it reaches budgets that are not discretionary.

Xopenex HFA · 4 platforms · live, still open · as of Aug 24, 2026

THE OUTCOME

What winning looks like.

A step, then a plateau

Flat through spring, a marked lift in June, then held for three months. A level shift that stuck — not a drift.

43.4%

share of voice — leading 6 of 10 category questions against Cargill, Arkema and Kraton.

AI citation rate · specialty materials manufacturer · Mar–Aug 2026 (Aug = partial month)

How to read this: measured before and after, not a causation claim. Platform coverage changed over the period, so the constant-basis line is the one to read — it holds three platforms fixed across all six months. A focused specialist out-citing multinational incumbents is the achievable end state the preceding slides diagnose toward.

Measure. Defend. Compete.

1

ModelScore™

A transparent 0–100 composite of AI visibility, with weights, inputs and methodology published. An unconnected data source is excluded and disclosed — never scored as a silent zero.

2

Accuracy detection

Customers load verified brand facts, including regulatory and claim language. Every contradicting AI statement is surfaced, graded by severity, flagged when compliance-sensitive, and captured verbatim.

3

Share of Voice

Head-to-head citation share, query by query and platform by platform — including rivals with no website at all: a molecule, a class, a generic, matched by name and alias. Brand families share one denominator instead of competing with each other.

ModelScore™ composition

Mention Score	45%	Brand Demand	20%	Authority Transfer	20%	Technical Readiness	15%
---------------	-----	--------------	-----	--------------------	-----	---------------------	-----

Nine AI platforms integrated — ChatGPT, Perplexity, Claude, Gemini, Grok, Copilot, DeepSeek, Mistral, Google AI Overviews — extensible via our Platform Registry. Ten-plus built-in tools, two of them new in 4.28.0: the Answer Position Estimator, and a Content Change Tracker that ties an unlogged page edit to the movement in that page’s AI-citation share. The product is bring-your-own-key: customers enable the platforms they fund, so marginal inference cost to CiteMetrix approaches zero.

The deliverable arrives wearing the agency's logo.

An agency uploads its own branded PowerPoint with {{tokens}} where the data belongs. CiteMetrix fills them with live client numbers, written analysis and the agency's own logo.

Agencies do not want a vendor's brand on a client deliverable. They want theirs. This is the mechanism that turns a tool an agency uses into a tool an agency resells.

Also in the Report Builder

- Twelve ready-made reports, each written for a specific reader — CMO, brand manager, technical lead
- PDF or native, editable PowerPoint
- White-label branding throughout
- Saved templates, fixed reporting periods, scheduled delivery

“Whenever I am talking with clients about GEO and content optimization they are all over it. We will be building it into all our website scopes.”

— Managing Director, Digital Strategy & Delivery, healthcare digital agency · a relationship from our consulting practice

Channel-led. Unlimited client domains.

Agency plan	Small	Medium	Large	Global
Monthly price	\$299	\$599	\$999	\$4,999
Query pool	25	75	200	2,000
Seats	2	5	10	50
Client domains	Unlimited	Unlimited	Unlimited	Unlimited

Expansion without a sales event

An agency adding its eleventh client does not hit a ceiling. It consumes more of its query pool and moves up when it genuinely needs to. Revenue tracks the agency’s own utilisation instead of a renegotiation.

A parallel Business track — \$79 to \$1,499+ — serves brands buying directly. All plans are live and purchasable today.

No one else is building for the brand buyer.

Analytical depth

Surface monitoring SEO buyer

Brand buyer

What no competitor combines

- Composite visibility score with published methodology
- Hallucination detection against customer-supplied verified facts
- Agency pricing with unlimited client domains
- White-label and bring-your-own-template reporting
- Mobile surface with push notifications and voice

Their SEO-first positioning is publicly committed and expensive to reverse. We estimate a 3–9 month window.

Product built. Distribution is what this round funds.

570

releases in six months

\$0

outside capital raised

31,614

AI citations logged (as of Aug 24, 2026)

581

scan runs completed

Stated plainly

- Pre-revenue. No paying customers to date.
- 14 active monitored domains across three verticals.
- Paid plans are live and purchasable today.
- SOC 2 Type II is not certified — it is funded by this round.

What an investor is underwriting

Distribution risk, not product risk. The platform is complete, purchasable, and producing client-grade output on live brands in three verticals. What has not been built is a sales motion — which is precisely what this round funds.

THE PLAN

What \$1.75M builds.

Senior backend / AI engineer

Month 2

Scan infrastructure, SOC 2 readiness, roadmap delivery. Removes the single-founder dependency on the platform.

Agency channel sales

Month 3

Owns agency acquisition and partner enablement. A specific AEO channel operator has been identified for this role.

Customer success / onboarding

Month 3

First-scan briefings, account health and agency business reviews for the first fifty accounts.

Milestones to Seed

- \$250K+ ARR, at least 60% originating in the agency channel
- SOC 2 Type II certified
- First regulated-vertical enterprise customer signed
- One named, client-approved case study from the agency channel

Seed target: Q2 2028

Eric Richmond — Founder & CEO. Thirty years in search, from directory listings through PageRank and structured data to AI answer engines. Built CiteMetrix solo to v4.46.0. · Brian Cauley — strategic advisor: GTM positioning, channel strategy, capital markets.

THE ASK

\$1.75M at \$5M pre-money.

Approximately 26% dilution. Priced equity. Eighteen months of runway from initial closing.

Engineering hire	\$360K
Sales hire	\$330K
Customer success hire	\$180K
Founder salary	\$180K (\$120K/yr × 18 mo)
Marketing & channel	\$200K
Product & infrastructure	\$150K
SOC 2 + initial legal	\$80K
Financial & ongoing legal	\$50K
Reserve / contingency	\$220K

Rolling close

Initial closing

31 December 2026 — minimum \$500K

Final closing

31 March 2027 — up to \$1.75M

Board observer

Available to lead at \$500K+
